## Filters

Filter	Description
Boolean	Available for Yes/No field types. Conditions display a drop-down list similar to list filters.
CustomOnly	Uses filtering criteria from advanced and Boolean operators.
List	Usually associated with fields used for coding documents. Conditions vary by the type and purpose of the field associated with it.
Multi-list	Uses multiple conditions from a drop-down menu. You can connect the conditions with the OR or AND operator.
Popup Pickers	Contains values for multiple or single choice fields, as well as multiple or single choice objects.
Textbox	Used to search on specific terms, numbers, and dates. You can enter multiple terms connected by any of the following operators: <ul style="list-style-type: none"> <li>▪ AND</li> <li>▪ OR</li> <li>▪ BETWEEN</li> <li>▪ = (equal)</li> <li>▪ &gt;= (greater than or equal to)</li> <li>▪ &lt;= (less than or equal to)</li> <li>▪ % (to filter for NOT null)</li> </ul>
