Workspace security

Group management security settings

1. **View Users**
   Displays a list of the users in the selected group.

2. **Edit Permissions**
   Edit the permissions of the group for objects, tab visibility, and other settings.

3. **Copy**
   Copy the selected group’s permissions to a new or existing group.

4. **Preview**
   Opens a preview of the Relativity workspace with the selected group’s permissions applied.

5. **Add/Remove Groups**
   Add or remove groups in the environment for a particular workspace and begin editing their permissions.

Object security permission controls

- **None**
  Denies the group members access to the object.

- **View**
  Group members can view the object. This is the most basic level of permissions.

- **Edit**
  Group members can edit and view the object.

- **Delete**
  Group members can delete the object.

- **Add**
  Group members can add new instances of the object.

- **Edit Security**
  Group members can edit the security for instances of the object.
Workspace security

**Tab Visibility**

1. **Group drop-down**
   - Displays the current group whose permissions you’re editing.
2. **Search Bar**
   - Type the name of the tab you want to make visible for the group.
3. **Selected tab**
   - This tab is visible for the group.
4. **Child tab**
   - You can select a parent tab for visibility without the child tabs. However, you can’t select a child tab for visibility without its parent.

**Other Settings**

1. **Group drop-down**
   - Displays the current group whose permissions you’re editing.
2. **Browsers**
   - Gives users the ability to view the selected browsers in the documents tab.
3. **Mass Operations**
   - Gives users the ability to perform selected mass operations.
4. **Admin Operations**
   - Gives users the ability to perform selected admin operations.
