  - Show Tab Strip
  - Pop Out Viewer
  - Swap Layout

Review Interface Features		
1	Viewer type tabs	Select which Viewer type you would like to view the current document in.
2	Viewer	Displays the current document in the selected Viewer.
3	Document navigation	Browse across documents in the Review queue.
4	Coding layouts	Customizable coding forms for viewing and editing a document's fields.
5	Related items card	Identify and act on documents related to the active document.
6	Document list	List presentation of all the documents in the user's Review queue.
7	Viewer settings	Menu of display configurations and review settings.
	Keyboard Shortcut Legend	Displays the keyboard shortcuts legend.
	Enable/Disable Keyboard Shortcuts	Turns keyboard shortcuts on or off.
	Show/Hide Tab Strip	Display or hide the Sidebar and Tab strip in the Viewer.
	Pop Out Viewer	Select to open the Pop Out Viewer in a new browser window.
	Swap Layout	Select to move the Coding Layout and the Document card to the opposite side of the Viewer from where they are currently located.
8	Document Actions	Menu of actions the user may perform on the document as a whole.
	Download document native	Download the native file for the current document. Alternatively, you can click on the document's name to download the native.
	Copy document link	Select to copy the URL to the current document to your clipboard.
	Email document	Select to open an email in your default email application with the URL to the current document included in the body of the email.
	Replace document native	Select to replace the native file of the current document with a new file
	Image on the fly	Hover your cursor over this option and Image Profile options will display. Select the desired profile to begin imaging the current document.
	Replace images for this document	Hover your cursor over this option and Image Profile options will display. Select the desired profile to replace the images for the current document using that imaging profile.
	Reconvert	Select to clear your internet browser's cache and reload the current document for review.
9	Breadcrumbs	Displays your current location while browsing documents in the Related items card. If Documents is an active link, you can click it to return to the document you were viewing before browsing documents in the Related items card.

## Review Interface – Native Viewer

Native Viewer Features		
1	Native Viewer toolbar	The viewer toolbar buttons for each viewer display here.
- 100% +	Zoom controls	Manually zoom out/zoom in.
↺	Reset zoom	Reset to default zoom.
📐 📏	Preset zoom controls	Fit to Width / Fit to Height / Fit Actual.
📄	Layout mode	Select an option to determine how documents that are more than one page long display in the Viewer.
🔍	Highlight navigation next/prev	Navigate across all highlight search hits for checked terms within active sets or for specific highlight sets or terms when selected.
📄	Create PDF	Click to save the current native document as a PDF file.
2	Viewer Search Bar	Searches the current document for exact matches.
🔍	Viewer Search Bar	Enter a terms search to highlight the results in the Viewer. The Search Bar supports dtSearch and so proximity, fuzziness, and stemming can be used.
🔍	Viewer search next/prev	Navigate across Viewer search hits.
3	Left drawer Viewer options	Locate where the user may review highlight sets and terms associated with the current document or access the Thumbnail Viewer.
🔍	Highlight set expand/collapse	Allows the user to expand/collapse their view of each highlight set.
💡	Highlight set lightbulb	Lightbulb indicates whether a highlight set is active or inactive.
<input checked="" type="checkbox"/> attach~	Highlight term checkbox	Checkbox determines whether a highlight term is active or inactive.
Set	Selected highlight set navigation	Allows the user to navigate across all the highlight term hits within a given highlight set without having to turn off all other sets.
<input checked="" type="checkbox"/> Gas	Selected highlight term navigation	Allows the user to navigate across the highlight term hits for a specific highlight term without having to turn off all other sets/term.
(32 Terms / 1,500 Hits)	Highlight set term and hit count	Shows the number of terms and hits per highlight set when minimized.
7	Highlight term hit count and color	Shows the number of term hits in the highlight color scheme designated for that term.
🔍	Your recent searches	Shows a user-specific highlight set that contains recent searches the user has executed when interacting with the Viewer for a given Relativity session.
<input type="checkbox"/>	Show terms with zero hits	Enable to show highlight terms in a highlight set that do not have any hits for the current document.
📄	Thumbnails	Click to expand the left drawer and display the Thumbnail Viewer.
4	Collapsible cards	Document list and Coding layout/Related items cards can be minimized to focus on the Viewer or expanded as needed.
5	Right drawer Viewer options	Display or hide all hidden content in the current document or display or hide the Contextual Search Pane.
📄	Show/Hide Hidden Cells	Displays or hides all hidden content detected in the current document.
🔍	Show/Hide Contextual Search Pane	Click to display or hide the Contextual Search Pane. This feature allows you to quickly navigate to matching search terms in a document which is useful in longer documents or ones that have many matching search terms.
